Branch Development Summary:

- **recipe-feature:** Developed recipe discovery features including API integration, recipe cards, search, filtering, recipe details, missing ingredients, substitutions, and API optimization.
- **signup:** Developed authentication and pantry functionality including Firebase Authentication, Firestore integration, protected routes, and pantry management.
- **integration:** Combined both feature branches, resolved compatibility issues, completed testing, and prepared the final application.
- **main:** Final stable version prepared for submission and deployment.
